DETAILED ACTION

Election/Restrictions

Applicant's arguments regarding the restriction requirement of claims 1-30 is acknowledged and found persuasive. The restriction requirement is withdrawn and claims 1-30 are examined on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation "the Brewster angle" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Kinoshita (US 6,535,537).

Regarding claims 1, 10, 12, 16, 19-30.

Figure 1B illustrates a monolithically optically pumped semiconductor device having a semiconductor body, a ring pump source (7), a surface emitting quantum well structure (4), which receives pump radiation from the pump source and having a recess (9).

The method of claims 16, 19-30 are anticipated by the device of figure 1B.

Regarding claim 2.

Figure 1B illustrates recess (9) perpendicular to the pump radiation (arrows).

Regarding claim 3.

The recess will inherently have side faces.

Regarding claim 4.

Figure 1B illustrates the recess perpendicular to the pump radiation and the side faces will be parallel.

Regarding claim 6.

Column 4 lines 61-65, discloses the recess filled with semiconductor material.

Regarding claim 7.

The recess includes InP material as does the quantum well structure, as such the refractive will be substantially equal.

Regarding claim 8, 9.

Column 4 lines 26-28, discloses a vertical cavity surface emitting laser (VCSEL).

Regarding claim 13.

Figure 1B illustrates reflection films (50), which form a resonator.

Regarding claim 14.

Figure 1B clearly illustrates the pump radiation provided in the lateral direction.

Regarding claim 15.

The pump source (7) and the quantum well structure will different layer sequence, since the quantum well structure includes DBR (2) and (6), which are not present in the pump source.

Regarding claim 17.

Figure 1B illustrates the recess between the pump source (7) and the VCSEL (4).

Regarding claim 18.

Figure 1B illustrates waveguide (5).

Allowable Subject Matter

Claim 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
